

MacKay-Lyons Sweetapple Architects

HISTORY OF THE FIRM

MacKay-Lyons Sweetapple Architects is based in Halifax, Nova Scotia, Canada. The firm has built an international reputation for design excellence confirmed by over 125+ awards, including the Royal Architectural Institute of Canada Gold Medal in 2015 and Firm Award in 2014, six Governor General Medals, two American Institute of Architects National Honor Awards of Architecture, thirteen Lieutenant Governor's Medals of Excellence, eight Canadian Architect Awards, four Architectural Record Houses Awards, and eight North American Wood Design Awards. A fellow of the Royal Architectural Institute of Canada (FRAIC), and the Royal Canadian Academy of Arts (RCA), Brian MacKay-Lyons was named Honorary Fellow of the American Institute of Architects (Hon FAIA) in 2001 and was made an International Fellow by the Royal Institute of British Architects (FRIBA) in London. In 2017 the firm was awarded the prestigious Global Award for Sustainable Architecture, presented at an awards gala in Paris.

Both Partners are active in architectural education, Brian as a full professor and faculty member at Dalhousie University for 30 years, and Talbot, as an Adjunct Professor since 1997, and now a Professor of Practice as of 2013. Together, they have held 18 endowed academic chairs and visiting professorships at leading universities worldwide, such as: The Peter Behrens School of Architecture, Washington University in St. Louis, and Harvard University. They have also given over 200 public lectures on their work worldwide. Ghost (1994-2011) was a series of international Architectural Research Laboratories that took place on the Southern shores of Nova Scotia on the MacKay-Lyons farm. Ghost was founded by Brian as a meeting place for an international 'school' of architects who shared a commitment to: landscape, making, and community. The final installment of Ghost took the form of a three-day historic gathering where the twenty-five invited guests and speakers commiserated over these shared values and their 'resistance' to the globalization of Architecture.

The work of the firm has been recognized in 330+ publications including six monographs: Seven Stories from a Village Architect (1996); Brian MacKay-Lyons: Selected Works 1986-1997 (1998); Plain Modern: The Architecture of Brian MacKay-Lyons by Malcolm Quantrill (2005); Ghost: Building an Architectural Vision (2008); Local Architecture: Building Place, Craft, and Community (2014); and the most recent publication Economy as Ethic: The Work of MacKay-Lyons Sweetapple Architects which is authored by Historian Robert McCarter. In addition to these monographs, the work of the firm has been featured in 100+ exhibitions internationally.

These accomplishments are all the more surprising given the relative isolation of the firm in Atlantic Canada, outside of the centres of fashion. Both Brian and Talbot have long cultural roots in Atlantic Canada, through their common Acadian and Micmac ancestry, in Nova Scotia and Newfoundland respectively. While the body of work of MacKay-Lyons Sweetapple is known for its cultural responsiveness to local landscapes, climate and material culture, it also consistently possesses an archetypal quality which touches a global audience. Rather than being 'provincial' this work expresses the timeless and universal Vitruvian quality of 'Claritas' and formal professional design skill. A book of this kind from a firm that has largely been on the outside of things will reinforce a narrative of critical regionalism, made popular by the writing of Kenneth Frampton – a confirmed contributor to this book.
